Education

Gulf Asian English School

Sharjah, United Arab Emirates

Grade 12 – Science Stream — **CGPA: 8.36/10**

Class of 2025

- Coursework: Computer Science, Mathematics, Physics, Chemistry, Multi-Media, English Literature

Experience

Founder & Organizer

June 2024 – September 2024

Online Integration Bee

- Founded international calculus competition with **119 participants from 25 countries**; secured **Jane Street sponsorship**, managed global logistics, and authored problem sets.

Graphic Designer

October 2025 - Present

Freelance

- Designed a collection of **18 minimalist posters** Applied consistent color theory, typography systems, and grid composition to build cohesive aesthetic identity.

Content Writer

August 2024 – October 2024

ViSTEM

- Authored **10 technical STEM articles** for org serving **1,000+ students**, covering physics and emerging technologies

Research & Projects

CERN Beamline for Schools (BL4S) Competition | *Physics Simulation*

2024

- **Ranked 18th out of 3,000 international teams** in prestigious CERN particle physics research competition
- Designed high-fidelity 3D models of Large Hadron Collider experimental setup using **Blender**, visualizing detector configurations and particle beam paths
- Performed physics simulations using **GEANT4 and CMS software (INIS-IAEA)** to model particle interactions
- Edited and formatted research proposal in **LaTeX** investigating short-range correlations in the EMC effect

ExoSky – Exoplanet Night Sky Visualizer | *Python, HTML, CSS, MySQL*

2024

- Developed interactive web application at **NASA Space Apps Challenge** simulating night sky views from **5,000+ exoplanets** in NASA Exoplanet Archive and Gaia DR3 star catalog
- Led theoretical research and content writing, explaining astrophysics concepts and astronomical calculations
- Live at: exosky.org

Advanced Physics Demonstrations | *Inter-School Science Exhibitions*

2023 – 2024

- Constructed physical 3D models demonstrating wormhole physics and spacetime curvature concepts
- Designed theoretical nanobot medical framework with web application prototype connecting users to medical professionals

Leadership & Activities

COP28 Youth Delegate & Community Volunteer | *United Arab Emirates*

2023

- Represented students at UN climate conference; led recycling drives and student mentorship initiatives.

SparX Genius Competition Speaker

2024

- **Selected as 1 of 10 students** for annual TEDx-style speaking event at school
- Delivered 15-minute speech titled *"Orwellian Society: Reality or Hoax?"* analyzing surveillance culture to 500+ audience

Technical Skills

Programming: Python, HTML/CSS (Intermediate), SQL, LaTeX

Design & Modeling: Blender & AutoDesk Maya (3D Modeling), Figma, Canva, Affinity

Physics Software: GEANT4, CMS Simulation (INIS-IAEA)

Awards & Honors

CERN Beamline for Schools: 18th out of 3,000 teams globally, awarded certificate and commemorative materials

NASA Space Apps Challenge: Completed functional astronomy visualization project

SparX Genius: Selected speaker from competitive applicant pool of around 300 students
